Where Does Help Come From: A Case Study of Network Analysis in an Academic Group?

Official Journal of the International Network for Social Network Analysis

**CONNECTIONS** publishes original empirical, theoretical, and methodological articles, as well as critical reviews dealing with applications of social network analysis. The research spans many disciplines and domains including Anthropology, Sociology, Psychology Communication, Economics, Organizational Behavior, Knowledge Management, Marketing, Social Psychology, Public Health, Medicine, Computer Science, and Policy. As the official journal of the *International Network for Social Network Analysis*, the emphasis of the publication is to reflect the ever-growing and continually expanding community of scholars using network analytic techniques. CONNECTIONS also provides an outlet for sharing news about social network concepts and techniques and new tools for research.

**Front Cover:** Created by Chris McCarty, the graph represents all authors who have ever published in the journal *Social Networks*, excluding those who only published as single authors (isolates). Data were downloaded from the ISI Web of Science. Nodes represent authors, node size represents degree centrality, and the thickness of the line between nodes represents the number of articles co-authored in *Social Networks*. The design was used for the last Sunbelt conference (Sunbelt XXVIII International Sunbelt Social Network Conference) in January 2008.

## **International Network for Social Network Analysis**

**CONNECTIONS** is the official journal of the **International Network for Social Network Analysis** (INSNA). INSNA is a scientific organization made up of scholars across the world. INSNA includes official board members and five committees.
